

-20°C MANUAL DEFROST FREEZER

Packed with enough cooling power to maintain -20° C throughout with $\pm 2^\circ\text{C}$ temperature uniformity, this 23 ft³ freezer has six epoxy coated shelves to optimize storage capacity and a digital microprocessor to display the temperature. The chamber is sized to slide through door frames and plugs into a standard wall outlet. A floor drain with tubing attached is included for defrosting. Options such as interior circulating fan for $\pm 0.5^\circ\text{C}$ uniformity, extra shelves, door lock, hi/low alarm with battery back-up or relay, temperature chart recorder, interior doors, or stainless steel exterior construction are available.

- 23 ft³ of shelf space
- Microprocessor temp control
- Digital temperature display
- -24° thru 0°C temp range, $\pm 2^\circ\text{C}$
- Constant temperature cold wall refrigeration system
- Casters, locking, 3.5"
- Powder coated white or gray steel exterior
- White coated aluminum interior
- Non-CFC foamed insulation
- Self-closing, hinged, solid foamed door
- One year warranty on parts and labor, four add'l years on compressor motor (domestic)
